DETAILED ACTION

Election/Restrictions

- 1. Applicant's election of Group I, claim 1 in the paper submitted on 29 April 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- 2. Claims 2 and 3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the paper submitted on 29 April 2004.

Drawings

3. The drawings are objected to because there is no ``line 2-2'' in any of the drawings (note page 6 of the instant specification, at the brief description of Figure 2). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

${\it Specification}$

4. The abstract of the disclosure is objected to because in line 1, ``is provided'' is a term which can be implied and should not be used in the abstract; lines 2 and 3, ``comprising'' should be - including - - (legal or claim-type phraseology should not

Art Unit: 1732

be used in the abstract). Correction is required. See MPEP § 608.01(b).

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

6. The disclosure is objected to because of the following informalities: On page 6, the brief description of Figure 2, there is no `line 2-2'' in any of the figures.

Appropriate correction is required.

Allowable Subject Matter

- 7. Claim 1 is allowable over the prior art references presently of record.
- 8. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references presently of record, alone or in combination, disclose, suggest or teach a process of annealing an electrodeposition structure, including the aspect of the electrodeposition structure comprising an electroformed mold having a nominal thickness of

between and including 0.5 mm to 0.8 mm as set forth in independent claim 1.

Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 4,522,659 is of interest.
- 10. This application is in condition for allowance except for the following formal matters:

Correction of the drawings and specification.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO MONTHS from the mailing date of this letter.
